Family Homeless Prevention and Assistance Program (FHPAP)

Services Provided: The FHPAP provides grants to encourage and support innovation at the county or regional multi-county level in both establishing a comprehensive service system and in redesigning the existing homeless support system. Funds are used for a broad range of activities aimed at preventing homelessness, shortening the length of stay in emergency shelters, and eliminating repeat episodes of homelessness. Each project designs its own service delivery system.

Prevention services may include assistance in finding housing and other support services, as well as direct assistance with rent, security deposits, mortgage, and other assistance.

Guidelines: Services are targeted for families, single adults, and youth who are homeless or at risk of becoming homeless. Grants may be used to prevent or decrease the period of homelessness, and to stabilize participants in housing. Grants may not be used to pay for more than 24 months of rental housing assistance.
