

Greater Minnesota Housing Infrastructure

Grant Program –

Scale of Investment and Community Need

Methodology

Scale of Investment

Scale of investment includes two separate measures to promote Qualifying Housing Developments that have meaningful impact relative to the size of their community.

Unit Production (up to 15 Points)

Unit production is scored based on the Net Unit Production created by the Qualifying Housing Development. The table below provides the number of points possible based on a community's population size.

Use data from the 2023 year at the Minnesota State Demographic Center's <u>PopFinder for Cities and Townships</u> to determine a community's population. If the project spans multiple cities, townships, or unincorporated areas, the total population of all intersected communities should be used.

Qualifying Housing Development is located within a city, township, or unincorporated area with a population of:	Net Unit Production	Points
2,000 or below	Any number	15
Potygon 2 001 and 5 000	6 or more units	15
Between 2,001 and 5,000	5 or fewer units	10
	15 or more units	15
Between 5,001 and 10,000	6 to 14 units	10
	5 or fewer units	5
	50 or more units	15
Detruces 10 001 and 20 000	20 to 49 units	10
Between 10,001 and 30,000	10 to 19 units	5
	9 or fewer units	0
	150 or more units	15
30,001 and above	60 to 149 units	10
	30 to 59 units	5
	29 or fewer units	0

[&]quot;Net Unit Production" equals livable units planned to be added (new construction or substantial rehabilitation) less livable units planned to be removed (such as through condemnation or demolition).

Rural/Tribal Communities (up to 25 Points)

Applicants are eligible for up to 25 points based on the size of their community.

Use data from the 2023 year at the Minnesota State Demographic Center's <u>PopFinder for Cities and Townships</u> to determine a community's population. "Community" refers to the city, township or unincorporated area where the Qualifying Housing Development and Eligible Infrastructure Project are located. If the Qualifying Housing Development and Eligible Infrastructure Project area(s) span(s) multiple cities, townships, or unincorporated areas, the total population of all intersected communities should be used.

- **Scoring Tier 1 (25 points):** The project is within a city, township, or unincorporated area that has a population fewer than or equal to 2,000. Tribal Reservations and Dakota Communities are also considered Tier 1.
- **Scoring Tier 2 (15 points):** The project is within a city, township, or unincorporated area that has a population between 2,001 and 5,000.
- **Scoring Tier 3 (10 points):** The project is within a city, township, or unincorporated area that has a population between 5,001 and 10,000.
- **Scoring Tier 4 (5 points):** The project is within a city, township, or unincorporated area that has a population between 10,001 and 30,000.
- **Scoring Tier 5 (0 points):** The project is within a city, township, or unincorporated area that has a population greater than 30,000.

Community Need

Community Need is measured separately by the share of households that are cost burdened in a community and whether the community is located within a workforce housing area. "Community" refers to the city, township or unincorporated area where the Qualifying Housing Development and Eligible Infrastructure Project are located. If the Qualifying Housing Development and Eligible Infrastructure Project area(s) span(s) multiple cities, townships, or unincorporated areas, the score will be based on the intersected community scoring highest.

Large Share of Cost Burdened Households (up to 5 Points)

The first category evaluating community need is the share of all households in that community that are cost burdened by housing costs (rent/mortgage, taxes, insurance, and utilities). A cost burdened household spends 30% or more of its income on housing.

Applicants are evaluated for cost burden in comparison to other applicants in their region. The regional comparison helps to account for differences in cost burden found across the state. Map 1 highlights the definitions of regions under this category. All applicants fall into one of three scoring tiers, with the highest tier receiving 5 points.

- **Scoring Tier 1 (5 Points):** Top one-third of communities in the region that have the largest share of all households that are cost burdened. Tribal Reservations and Dakota Communities are also considered Tier 1.
- **Scoring Tier 2 (3 Points):** Middle one-third of communities in the region that have the largest share of all households that are cost burdened.
- **Scoring Tier 3 (0 Points):** Bottom one-third of communities in the region that have the largest share of all households that are cost burdened.

Table 1 provides scores by region and city for this scoring category. Minnesota Housing has omitted townships from this Table 1 to save space. For proposals where the Qualifying Housing Development and Eligible Infrastructure Project area(s) intersect a township and/or unincorporated area, Minnesota Housing's Planning, Research and Evaluation team will provide scores using consistent methodology.

Workforce Housing Communities (up to 10 Points)

Workforce Housing Communities are identified using data on: 1) total jobs, 2) five-year job growth; or 3) long distance commuting. Data on jobs and growth are from Minnesota DEED's Quarterly Census of Employment and Wages.¹ Data on commuting are from the U.S. Census Bureau's Longitudinal Employer – Household Dynamics program.²

Workforce Housing Communities include Top Job Centers, Net Five Year Job Growth Communities, and Long Commute Communities, each as defined below.

- **Top Job Center (10 Points):** A community that is one of the top 5 job centers in the region.³ Communities are buffered by 10 miles to account for a modest commuteshed. **OR**
- **Net Five Year Job Growth Community (10 Points):** A community that has at least 2,000 jobs in the current year and had positive job growth in the last five years. *Communities are buffered by 10 miles to account for a modest commuteshed.* **OR**
- Long Commute Community (8 Points): A community that has at least 2,000 jobs in the current year, is not a Top Job Center, Net Five Year Job Growth Community, and where 15% or more of the community's workforce travels 30+ miles into the community for work. Communities are buffered by 10 miles to account for a modest commuteshed.

The lists and map below highlight communities and areas that meet the criteria defined under this category.

Top Job Centers Communities
