News and Notes

Sep 27, 2011

The Census Bureau released new information on same-sex couples from the 2010 Census including the number of married couples and a set of preferred estimates of same-sex spouses and unmarried partners at the national and state levels. These estimates were developed to account for data capture errors that make it difficult to measure same-sex couple households. Estimates from the 2010 American Community Survey (ACS).

Instructions for Use

4. Look for Census Tract and Block information in the “pop up” table that appears next. (See below)

Remember that the Census Tract data field in HDS will always require six digits so you may have to “lead” or “trail” with “0” (zeros). The Block data field in HDS will always require four digits so you may have to “lead” or “trail” with “0” (zeros) in that data field as well.
