**2022 RFP/2023 HTC – Data Updated April 2022**

QCTs are based on census tract boundaries, but the boundaries of larger census tracts and reservations in Greater Minnesota do not always align. Thus, large geographic areas of some low-income reservations are not classified as QCTs. Reservations that meet the criteria for designation as a QCT are treated as a QCT equivalent area for scoring purposes if either (1) the entire reservation meets the definition of a QCT or (2) if a tract within the reservation is eligible under current HUD QCT criteria<sup>1</sup>. Applicants will find interactive maps to identify whether a property falls within these areas on Minnesota Housing’s website at [www.mnhousing.gov/profiles](http://www.mnhousing.gov/profiles).

**2022 RFP/2023 HTC Eligible Areas (3 Points)**

The reservations in the table below and identified on the map on the following page are eligible as Tribal QCT Equivalent Areas. To be eligible, these areas must meet either income or poverty thresholds:

- Areas are eligible based on income thresholds if 50% or more of households have incomes below the average household size adjusted income limit for at least two of three evaluation years (2016-2018 or 2017-2019).
- Areas are eligible based on the poverty threshold if the poverty rate is 25% or higher for at least two of three evaluation years (2016-2018 or 2017-2019).

**Indian Reservations or Trust Land in Minnesota Based on Characteristics of Eligibility for Qualified Census Tracts (Values in parenthesis represent years eligible from 2017-2019)**
